Artistic Practice as Research in Music: Theory, Criticism, Practice Mine Dogantan-Dack, 2016-03-03 Artistic Practice as Research in Music: Theory, Criticism, Practice brings together internationally renowned scholars and practitioners to explore the cultural, institutional, theoretical, methodological, epistemological, ethical and practical aspects and implications of the rapidly evolving area of artistic research in music. Through various theoretical positions and case studies, and by establishing robust connections between theoretical debates and concrete examples of artistic research projects, the authors discuss the conditions under which artistic practice becomes a research activity; how practice-led research is understood in conservatoire settings; issues of assessment in relation to musical performance as research; methodological possibilities open to music practitioners entering academic environments as researchers; the role of technology in processes of musical composition as research; the role and value of performer knowledge in music-analytical enquiry; issues in relation to live performance as a research method; artistic collaboration and improvisation as research tools; interdisciplinary concerns of the artist-researcher; and the relationship between the affordances of a musical instrument and artistic research in musical performance. Readers will come away from the book with fresh insights about the theoretical, critical and practical work being done by experts in this exciting new field of enquiry.

Messianic Exegesis Donald Juel, 1988 Professor Juel defends a simple thesis: The beginnings of Christian reflection can be traced to interpretation of Israel's scriptures, and the major focus of that scriptural interpretation was Jesus, the crucified and risen Messiah. He therefore proceeds to demonstrate how certain Old Testament texts came to be applied to Jesus as Christ. He argues that the interpretative application of such texts to Jesus was part of the interior logic of Christianity.

The Dawn of Music Semiology Jonathan Dunsby, Jonathan Goldman, 2017 The dawn of music semiology showcases the work of ten leading musicologists inspired by the work of Jean-Jacques Nattiez. Reflecting the energy and diversity of the

young field of music semiology, chapters in this volume discuss music and gesture, the psychology of music, and the role of ethnotheory, and offer new research on topics as diverse as modeling folk polyphony, spatialization in the Darmstadt repertoire, Schenker's theory of musical content, and modernism from Wagner to Boulez.

Medieval Music as Medieval Exegesis William T. Flynn, 1999 In this unique deconstruction of liturgical musicology, William T. Flynn explores the expanding scope of the discipline. He includes contextual and philosophic interpretation that encompasses biblical exegesis, medieval studies, Latin linguistics and ecclesiastical history. Flynn's comprehensive analysis shows that the interdisciplinary dimensions of the expanding field must be understood beyond their traditional boundaries.

Biblical Exegesis in African Context Frederick Mawusi Amevenku, Isaac Boaheng, 2021-09-07 'Biblical Exegesis in African Context' explores how the Church in Africa can affirm its uniqueness in terms of the African identity and experiences, and at the same time, remain faithful to the gospel message. The volume begins with an explanation of exegesis and hermeneutics, and the agenda for the rest of the book is set. The second chapter deals with textual criticism, which is the task of determining the originality of a biblical text. In chapter three, issues related to the context of the text are considered, after which the volume proceeds to examine the various literary forms present in the Bible— prominent among them being— Narrative, Law, Poetry, Prophecy, Wisdom Literature, Gospels, Acts of the Apostles, Epistles and Revelation. The authors then dedicate the next chapter to discussions on socio-rhetorical interpretation. The final chapters of the book deal with matters solely related to the context of Africa; this part intends to equip readers to be able to interpret the Bible from African cultural perspectives and then apply the gospel message meaningfully to the life of African Christians. Chapter seven deals with the emergence and historical development of African Biblical Studies (ABS), noting its relevance and how Africans can benefit from it. The main contention of the chapter is that Africans will better understand and apply God's word to their lives if they read the Scriptures in an African way. The volume then explores how African languages can be used to derive the meaning of scripture and apply it to real-life situations. Here, the authors contribute to the development of MTBH by developing a methodological framework for this interpretative tool. The next chapter of the volume deals with mother-tongue theologizing in Ghana. The final chapter considers the legitimacy of female leadership in the Church within the African context through the examination of two Pauline texts. This volume will be of interest to undergraduate and graduate seminary students, students of Biblical Interpretation in religions departments, as well as practicing pastors.

Interpretation and Intellectual Change Jingyi Tu, This volume deals with the development of Chinese hermeneutics, or exegetic systems, from their beginnings to the twentieth century. The contributors address critical issues in the study of Chinese hermeneutics by focusing on key periods during which the hermeneutic tradition in China underwent significant changes. The volume is divided into six parts, corresponding to the six major periods of intellectual change in traditional and contemporary China. Part 1 considers the foundational period of Chinese hermeneutics, examining Confucian classics such

as the Analects, Mencius, and the Book of Odes. Part 2 traces the broadening of the hermeneutic tradition from Confucian classics to the military canon, political discourse, astronomy, and Buddhist exegesis from the Han to the Chinese Middle Ages. In Part 3 the focus is on Zhu Xi's monumental synthesis and redefinition of the Confucian tradition at the beginning of the early modern period. His vision of Confucian thought remained influential throughout the imperial period, and his interpretations of the Confucian classics became state orthodoxy starting with the thirteenth century. Part 4 focuses on this challenge and discusses the intellectual changes that took place during the late imperial period and their profound effects on Chinese hermeneutics. Part 5 documents the challenges to traditional Chinese hermeneutics in the modern era and the emergence of a new, critical hermeneutics in the beginning of the twentieth century. The volume concludes with Part 6, which explores Chinese hermeneutics from a comparative perspective and identifies its distinctive features. The understanding of Chinese hermeneutics gained from these essays is that of a dynamic plurality of traditions that has endured into the twentieth century and continues to shape contemporary intellectual debates. Ching-I Tu is professor and chairperson in the Department of Asian Languages and Cultures at Rutgers University in New Brunswick, New Jersey. He is the author of *Poetic Remarks in the Human World*, and editor of *Tradition and Creativity: Essays on East Asian Civilization and Classics and Interpretations: The Hermeneutic Tradition in Chinese Culture*, both published by Transaction.

A Handbook to Old Testament Exegesis William P. Brown, 2017-03-17 Designed for both Hebrew and non-Hebrew students, *A Handbook to Old Testament Exegesis* offers a fresh, hands-on introduction to exegesis of the Old Testament. William P. Brown begins not with the biblical text itself but with the reader, helping students to identify their own interpretive lenses before engaging the biblical text. Brown guides the student through a wide variety of interpretive approaches, including modern methodologies—feminist, womanist, Latino/a, queer, postcolonial, disability, and ecological approaches—alongside more traditional methods. This allows students to critically reflect on themselves as bona fide interpreters. While covering a wide range of biblical passages, Brown also highlights two common biblical texts throughout the work to help show how each interpretive approach highlights different dimensions of the same texts. Students will appreciate the value of an empathetic inquiry of Scripture that is both inclusive of others and textually in-depth.

Handbook of Music and Emotion Patrik N. Juslin, John Sloboda, 2011-03-17 A successor to the acclaimed 'Music and Emotion', *The Handbook of Music and Emotion* provides comprehensive coverage of the field, in all its breadth and depth. As well as summarizing what is currently known about music and emotion, it will also stimulate further research in promising directions that have been little studied.

Olivier Messiaen's System of Signs Andrew Shenton, 2017-07-05 Andrew Shenton's groundbreaking cross-disciplinary approach to Messiaen's music presents a systematic and detailed examination of the compositional techniques of one of the most significant musicians of the twentieth century as they relate to his desire to express profound truths about Catholicism.

It is widely accepted that music can have mystical and transformative powers, but because 'pure' music has no programme, Messiaen sought to refine his compositions to speak more clearly about the truths of the Catholic faith by developing a sophisticated semiotic system in which aspects of music become direct signs for words and concepts. Using interdisciplinary methodologies drawing on linguistics, cognition studies, theological studies and semiotics, Shenton traces the development of Messiaen's sign system using examples from many of Messiaen's works and concentrating in particular on the *Motets sur le mystère de la Sainte Trinité* for organ, a suite which contains the most sophisticated and developed use of a sign system and represents a profound exegesis of Messiaen's understanding of the Catholic triune God. By working on issues of interpretation, Shenton endeavours to bridge the traditional gap between scholars and performers and to help people listen to Messiaen's music with spirit and understanding.

Faith, the Fount of Exegesis Ignacio Carbajosa, 2013-09-30 This book is a response to a desire expressed by the then Cardinal Joseph Ratzinger (the future Pope Benedict XVI) who called for a diachronic study of the results of the historical-critical method. The study of the last 150-200 years of biblical research shows how the claim to scientific rigor made in many works, that is, the claim to have obtained results comparable in their certainty to those of the natural sciences, is clearly unrealistic. This is a comprehensive analysis of the results of almost two centuries of the historical-critical method in two areas: the investigation into the sources of the Pentateuch and the study of the figure of the prophet. It reveals the philosophical and cultural presuppositions which influenced the development of exegesis and its most notable hypotheses, demonstrating the world of prejudices which frequently have conditioned the exegesis called scientific. It also engages the characteristic dimensions of the Catholic interpretation of the Old Testament, attempting to unify the two basic dimensions of the exegetical method: history and theology. Overcoming the disconnect between scientific exegesis and believing theology is one of the great contemporary challenges to the *intellectus fidei*. This dualism cannot be overcome simply by a call to greater devotion or the generous intention of adding pious commentary to an exegesis which has not, from the beginning, been based on faith. This book provides a positive contribution to the hermeneutical problem at the heart of current exegetical debate, the status of exegesis, addressing such questions as: Does exegesis have a theological character? Should it have one? If it does have one, would it not then lose its scientific character? Thus one arrives at the main question: how can one conceive of an exegesis that is at the same time critical and theological? How can faith be the foundation of exegesis from the beginning? Could Faith really be the Fount of Exegesis?

Musical Exegesis in the Sequences of Adam and the Canons of St. Victor Margot Elsbeth Fassler, 1989

Image, Text, Exegesis Izaak J. de Hulster, Joel M. LeMon, 2015-02-26 Images from the ancient Near East are an important though generally underutilized source of data for interpreting the Hebrew Bible and the cultural context from which it emerged. The essays in this volume highlight the ways that ancient Near Eastern iconography can inform exegesis. This aim is accomplished through case studies in iconographic exegesis that exhibit sound methodologies for relating images and texts. Since the 1970s, biblical scholars have been turning increasingly to iconography as a source for understanding the religion, history and literature of the ancient Near East. The essays in this volume tackle two thorny issues: 1) how images reflect the cultures that produce them and 2) the nature of the relationship between images and texts, both within discrete cultures and among different cultures. Until now, there have been relatively few methodologically self-conscious treatments of ancient iconography and its relationship to the biblical text. So this volume addresses a clear need for demonstrating transparent and consistent methods for iconographic work among biblical scholars.

Music, Language and Identity in Greece Polina Tambakaki, Panos Vlagopoulos, Katerina Levidou, Roderick

Beaton, 2019-09-23 The national element in music has been the subject of important studies, yet the scholarly framework has remained restricted almost exclusively to the field of music studies. This volume brings together experts from different fields (musicology, literary theory and modern Greek studies), who investigate the links that connect music, language and national identity, focusing on the Greek paradigm. Through the study of the Greek case, the book paves the way for innovative interdisciplinary approaches to the formation of the 'national' in different cultures, shedding new light on ideologies and mechanisms of cultural policies.

Philosophy - Basic Notions, Volume 1 Nicolae Sfetcu, 1900 A basic introduction to the world of philosophy, with answers to the deepest questions we all ask ourselves, through the lens of the world's greatest philosophers, from Plato and Confucius to modern thinkers. A guide to the fundamental nature of existence, society and the way we think. After an overview of philosophy, with the history of philosophy, branches of philosophy, philosophical concepts and philosophical schools and traditions, specific topics in philosophy are addressed, such as God (religion), good and evil (ethics), animal rights, politics (political philosophy), appearance and reality, science (philosophy of science), mind (philosophy of mind), and art (aesthetics). Philosophy is the study of general and fundamental problems concerning such matters as existence, knowledge, values, reason, mind, and language. Philosophical methods include questioning, critical discussion, rational argument, and systematic presentation. Classical philosophical questions include both abstract questions (Is it possible to know something and prove it? What is most real?) and more practical and concrete questions (Is there an optimal way to live? Is it better to be just or unjust? Do people have free will?) Philosophy is distinguished from other ways of approaching these problems by its

critical, generally systematic approach and reliance on rational arguments. Other investigations are closely related to art, science, politics, or other pursuits. For example, is beauty objective or subjective? Are there many scientific methods or just one? Is political utopia a hopeful dream or hopeless fantasy? The main sub-fields of academic philosophy include metaphysics (concerned with the fundamental nature of reality and being), epistemology (about the nature and foundations of knowledge and its limits and validity), ethics, aesthetics, political philosophy, logic, philosophy of science and the history of Western philosophy. Many philosophical debates that began in antiquity are still debated today.
